

Agreement for a Tattoo

between
Millennium Tattoo und Piercing Auer Bauer KG, Obermünsterstraße 15, 93047 Regensburg
and

Name: _____ Last Name: _____

Street: _____ ZIP/City: _____

Date of birth: _____ Phone number: _____

I am hereby getting a tattoo upon my own wish.
I have been informed and am aware of the procedures and dangers of getting a Tattoo.

The general risk by getting a tattoo is, that it can get inflamed or cause allergic reactions to the colors, what can lead to pus, rash, or going numb skin. After tattooing in individual cases the color of the outlines can turn out.

If your skin tends to scare your tattoo can scar. Also too less and wrong aftercare can cause scars. In those cases you should immediately consult a doctor. We also inform you that an operative removal can become necessary. Also we request you to hold still during the complete tattoo process ore else it can affect the shape of the tattoo.

I am aware that I have influence on form, size and color before and during the tattoo process.

I have no rights to sue millennium tattoo if I dislike my tattoo for any reasons. I have been informed that I am responsible for the proper care and treatment of my tattoo. We are not responsible for any flaws in the tattoo work due to ignorance of proper hygiene and care.

Agreement for a Tattoo

Aftercare for Tattoos

1. After approximately two hours you can remove the saran wrap. You may now wash your tattoo with lukewarm water and mild soap, pad dry it with a clean cloth (or paper towel) carefully. You should use a panthenol-cream or a special tattoo-cream for further treatment. For the first week after tattooing you should rewrap your tattoo with saran wrap after you cleaned and creamed it. Important: **Do not scratch!!** (If you scratch or do not cream, or both, you will get scars!!) The healing will take about 14 days.
2. The tattoo must be creamed at least 4 times a day during the complete healing process. The skin may **never** dry out. A crust develops on top of the tattoo which must fall off by itself. In case of an inflammation of the skin, only treat tattoo with panthenol cream, or if necessary, depending on the process of the inflammation, seek medical advice. You are also welcome to see us here in the shop in cases of questions or problems.
3. Do not go in to chlorine water (swim bath, whirl pool), and avoid sunlight (also tanning bed) for at least two to four weeks after tattooing.
4. The area at the tattoo should not sweat. You should therefore avoid strong transpiration. Clean and loose- fitting clothes will reduce the risk of an infection. In case clothes do rub over the tattoo, cover it with saran wrap after cleaning and creaming.
5. It is normal that the skin secretes lymph, blood and even tattoo ink in the first three to four days after tattooing. In this case, clean the area with a clean and dry cloth or paper towel by dabbing the tattoo easily and apply tattoo- or panthenol cream.
6. You can take showers as usual. You should not use shower gel on the tattoo, but rinse the tattooed area with an easy jet of water. After that, dab the tattoo easily with a clean cloth or paper towel and immediately apply cream! You should not take a bath during the healing – phase.
7. After around two to three weeks, when the tattoo is completely healed, Please visit us for a final check.
8. In case you have questions about the healing process of your tattoo, just drop in and ask us. We are there for you also after the tattooing.

By following these simple rules you extremely minder the risk of getting an infections or scars also it will keep you healthy.

Enjoy your new Tattoo
